**HON. ALLAN DE LEON**

Municipal Mayor  
Municipality of Taytay

Thru: **HON. VICE MAYOR PIA CABRAL**

Presiding Officer  
Sangguniang Bayan

SUBJECT: REQUEST FOR E-TRIKE SPECIAL FRANCHISE PERMIT FOR GREEN PROJECT, TO SUPPORT ELECTRIC VEHICLES & INDUSTRY DEVELOPMENT ACT (Evida Law)

Dear Honorable Mayor De Leon,

We, Officers and members of Luzon Eco Transport Services and Multi Purpose Cooperative representing public transport operators, signifying our intention to lobby your administration to embrace and support Electric Vehicles And Charging Station Act.

Rationale / Background:

The Philippines made one of the most determined declaration among all countries under the PARIS Agreement. When we undertook to reduce our greenhouse gas emission by 70% by 2030. This PARIS Agreement was voted and ratified by Senate dated March 14, 2017.

The rise electric vehicles (EV) is viable mode of private and commuter transportation is a welcome development in the face of volatile global oil price shocks and worsening climate change. The establishment of a local policy to regulate and encourage the development of the EV industry will foster the locality energy independence and help the municipality for the reduction of its contribution of greenhouse gas emission, considering the economic and environmental benefits to the municipality.

The Electric Vehicles that we are advocating will increase accessibility and economic viability of a key emerging technology which will help the locality meet its emission reduction goals.

On September 19, 2022 during the courtesy call of the DOST Regional Director Emerita Bagsit, together with Rizal Provincial Director Fernando Ablaza you identify and endorse an 100sq. meters space for the EV charging station and thru Public Private Partnership the Pilot project on EV charging station of

In line with the foregoing, This initiative's from our sector address to the Sangguniang Bayan thru the office of Honorable Mayor Allan De Leon seeks to support, promote, develop and eventually mainstream the use of Electric Vehicles (EV) for public and private transportation purposes in the municipality among others.

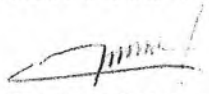

Suggested recommendation for legislation are the following:

1. Determining and Identifying Green Routes as pilot area  
Municipal Hall to SM TAYTAY ROUTE  
Club Manila East premises was suggested as pilot for green route using electric trike to play as a public transport
2. Special Fleet E-TRIKE Franchise Permit for Pilot Project for initial of Ten (10) units to ply within the green routes (from Municipal Hall to SM TAYTAY and vice versa).
3. Transport Cooperative (LETS-MPC) will act as the conduit partner for this endeavour and responsible to provide E-TRIKE Units.

Mr. Mayor, We believed that this green project initiatives will plays a vital role and greatly help the goals of the Rizal Provincial priority program with the Ynares Administration "better known as "Ynares Eco System **(YES PROGRAM)**.

Hoping that this recommendation coming from the Public Transport Operators (Taytayenos) will be given a favorable action.

LUZON ECO TRANSPORT SERVICE  
MULTI PURPOSE COOPERATIVE, (LETS-MPC)
